How to Make More Money without Start up Capital and Retire Rich

Conclusion

Before you start there are two things you will need.

Discipline

This is the most important betting tool that you must develop, without it you would be as well donating your hard money straight to the bookmakers.

No longer will you be the idiot who gets the tip of the century only to lose it in a simple double. Multiple bets are for losers and should be avoided at all costs or the bookmakers are always going to make money from you.

Do not get greedy; be happy to make a profit. Every time you make a profit, you win. Multiple small profits make big wins.

2) Start treating your betting strategy as a business by focusing on long-term profits. Start right now and set aside an amount for your bets...this will be called your betting bank. All successful bettors use a betting bank, treating this bank similar to owning a Limited Liability Company. Depending on your budget you can start with either: \$200, \$1,000, \$2,000 or \$5,000 or any other amount that you are comfortable with. Keep doing this until you are happy with the size of the bets you're using...and the profit this bet size is generating for you. When you reach this stage you simply stop increasing the size of your bank and bets...and start to withdraw the profits every month or so.

Most people who bet (although they may not admin it) love to have a bet; they love the thought that they could win a lot of money over the space of a short time.

These people unfortunately lose time and time again.

The people who win treat betting as a business, they bet on events they know will win them money, they don't even have to watch the games, they know their money is increasing.

The people who win use the bookies systems against them, the systems that are place to make them money, and they are powerless to stop it!

This system shows you how you can safely turn \$500 into \$64, 872.9 every year.

In this system I will tell you how to check for odds that qualify for football trading on a daily basis.

Don't believe the myth that the bookmakers can't be beaten, I've done it and you can too if you stick to what I tell you and have a little bit of patience.

Introduction

Hi this is Harry Okoyibo of Sportbetting-Ng.com. Welcome to this special eBook that I've put together to share with you my amazing and revolutionary strategies to use in trading European football that very few people are using.

Before now most of us believed that the best investment opportunities out there both offline and online are stocks trading, mutual fund, bonds, commodity, forex trading, e-currency online trading e.t.c, but when I discover European football trading secret, I just abandon all other kinds of investment opportunities because I don't need an experts to tell me what and what to do before I will make profit or better still I don't need to become an expert to make nice profit from football (soccer) trading.

All we are looking for are "ways to increase our monthly income" even the rich are looking and searching for more opportunities to become richer on daily basis, is it a bad thing if you have more than 4-5 stream of income flowing into your bank account on monthly basis?

European Football trading is an investment opportunity that can make you richer than you will ever imagine. You're guaranteed to make profit every month and you have the opportunity of trading on daily basis because Football trading is a non-stop cash-generating machine!

European Football trading is like arbitrage trading but a bit different because an arb traders need to register with many of the bookmakers out there with a lot of money to spread (deposit) into these accounts and he makes profit no matter the outcome of the match.

A sports arbitrage situation is shown below:

Example Arb:

IBF/IBO Flyweight Title-Fight (Darchinyan v Donaire)

Over 7.5 Rounds » 2.39 (Pinnacle) » £485 returns £1,159
Wont Go 7.5 Rounds » 2.25 (Bodog) » £515 returns £1,158

Total arb / surebet : 15.89%

A correctly staked investment of £1,000 guarantees a return of £1,158 whatever the outcome of the match. That's £158 profit due to discrepancies in the bookmakers' odds guaranteeing a 15.89% profit on your investment!

The above information tells us that Darchinyan and Donaire are competing for the IBF/IBO Flyweight boxing title. It also tells us that Pinnacle Sports have odds of 2.39 for the fight to last for over 7.5 rounds, and Bodog have odds of 2.25 for the fight to end in fewer than 7.5 rounds.

By applying a simple mathematical formula to those odds, we are able to calculate that we can cover both possible outcomes of the bet and make a guaranteed 15.89% return on our investment.

We would invest our money in proportion to the odds on each possibility. The amount to invest on each outcome is calculated using another simple formula. £485 invested on over 7.5 rounds returns £1,159 and £585 invested on under 7.5 rounds returns £1,158.

$$£485 \times 2.39 = £1,159$$

$$£515 \times 2.25 = £1,158$$

$$\text{Risk free profit} = £158$$

Note: with European Football matches there are three results possible, win, lose or draw and you will place the 1x2 (3bets) using just one bookmaker account unlike arbitrage trading.

This business is not a Get-rich-quick-scheme but I assure you that you are guaranteed of making a nice profit every month if you follow my instruction to the end (Slow and Steady).

The reason why you are here is to get tips, tricks, advice and especially learn some real football system from someone who cracked the code and knows how to beat the bookie when it comes to football trading.

I'm here to show you how to make a lot of money trading on football match and believe me; you'll make A LOT of money. **Just follow me step-by-step.**

What you can expect

Now I want to warn you about something. This football trading system is not a get rich quick scheme. No system can make you turn \$50 into \$5,000 within a week. This is very important to understand.

Football trading will allow you to make some serious money over the long run when you know how. To have success at football trading, you need to understand that it is an investment. If you can think about it this way, you'll be successful. You have to go slowly and build a solid bankroll over the long run.

However, the reason why we use football trading is because there's so many games that are played each day that we can make a good profit rapidly and almost every day.

But first, the most important thing you need to focus on is **discipline**. Yes, discipline is probably the major factor that will influence your success. You have to learn the system and **stick to it**.

Sure, nothing is sure in life so that is for gambling. When you start using a system, I told you that it was an investment. So, use it like an investment. You have to use money that you can afford to lose. If for an unknown reason should you lose your bank, you will have enough money to pay the bills, pay your mortgage, food, take care of your responsibility, etc...

To be honest, it never happened to me. Yes, this system is amazing. However, who knows? Everything could happen in life and you should be prepared.

The way you have to think about it is simple. Instead of investing \$2000 in anything, just invest \$1800 and use the remaining \$200 to use for this system. Your \$1800 could give you a nice 15% profits over the year but your \$200 and this system could give you a nice 500% profit or more in return if you follow the rules to the letter.

This is what I say to every new punters and sports bettor. Think like an investor and do like an investor. Your trick will be the football trade world and the Internet. Believe me, nothing works better than that.

Sportsbooks

When betting or trading on football, you need a safe and reliable sportsbook to place your bets online.

These are the sportsbooks with greatest reputation and volume of money. They offer the best odds/lines in any kind of sports. They are safe and reliable. You can withdraw/deposit 24/7. The most important thing is that they are publicly owned company (listed in the stock market). You can also open your account with your choice of currency.

The best **bookmakers** to use for football trading can be viewed by going to www.sportbetting-ng.com/sportbook.html

Methods of Account Funding

In addition to VISA, you'll also enjoy the benefit of being able to fund your account with a Mastercard, NETeller, Western Union, Money Gram, Bank wire transfer, and others.

NOTE: People from West Africa "Nigerian" are allow to use only Bank wire transfer for funding and withdrawal and below are the instructions to follow:

Bank transfer allows you to make a bank-to-bank transfer to fund your account. Please include your name and account number to ensure your account is credited quickly and accurately.

Once you have sent the bank transfer and received confirmation from your bank, please notify us so that your funds are promptly credited.

Notify us by:

1. Logging in to your account and using the Bank Wire notification form in the My Account section; or
2. Faxing your wire receipt to +61 3 9948 9885

Please note that bank transfers typically take 3-5 business days to reach us.

US DOLLARS

Bank: National Westminster Bank
Address: 280 Bishops Gate, London EC2M 4RB
SWIFT BIC: NWBK GB 2L
Account Name: CSBUK
IBAN: GB96 NWBK 6073 0123 5034 16
Account Number: 1400/00/23503416
Reference Details: Your Name & Acct No.

Withdrawal Of funds

Once you have logged in to your Account you are able to request a withdrawal via the secure forms on My Account page. Alternatively, please contact our Customer Service department and request a withdrawal over the telephone. Please allow up to 10 days for your withdrawal to reach your bank.

Fees

The bookmaker does not charge customer for processing direct bank transfers.

Better still if you want to have a US bank account of your own to collect all your earning, then you will need to pay the sum of N2, 100 for the report & instruction on how to open your own US checking account with a Nigeria bank without you doing any postage at all.

FOOTBALL TRADING: The Best Internet Business Ever

The best & easiest business I've ever seen on the Internet that can make a dummy (Nobody) to become Wealth (somebody). I'm a Living Proof...

After many years of surfing the net for money going from one business to another until now I've not find any other viable business that can make you wealthy with little work without selling of any products online.

Some reasons why FOOTBALL TRADING is the best INVESTMENT

- 1) Its stress free
- 2) Require little start up capital (\$100 and above)
- 3) Take just 10 minutes of your time daily
- 4) No experience or skill needed
- 5) No website, mini-site or blog needed
- 6) It's a daily opportunity
- 7) You don't need to wait for check every 2weeks
- 8) No selling of info products
- 9) You don't need a paypal or merchant account
- 10) No foreign address or phone Number needed
- 11) You don't need to talk or place advert before you earn
- 12) No third party needed (You can do it yourself)
- 13) You are sure of 50% monthly returns
- 14) Can turn \$500 into \$64, 872.9 every year
- 15) Other does the technical work (picking the winning teams) for you.
- 16) You are sure of making money whether in summer, winter, public holiday, on vacation etc.
- 17) You make profit whatever the outcome of the match
- 18) No employee needed
- 19) No office space needed (you can do it in your bedroom)
- 20) You are in charge
- 21) You are the Boss.

4 Ways to Source For Capital

1, Through personal saving. For example if your wages is N10, 000 every month, you can decide to save N2, 000 from your salary every month.

2, Through friends, let say you have 100 friends and you meet with them for financial assistance and 20 of them (**your friends**) gave you N2, 000 each, that is N40, 000 investment Capital.

3, Through bank soft Loans, If you don't know yet, that many of the rich and Elite in our Nation takes Loans for Investment. UBA, OCEANIC and some other banks give their client's loan without wahala (Loan without Collateral) if you need more information about UBA No Wahala Loan. Visit: www.ubagroup.com, Email: cic@ubagroup.com or of the banks customer department. Ok

4, Through OPM --- Other people Money, you can decide today and become a fund manager or have a fund management program. Many Nigerians have money they wish to invest, but don't have time to go online and trade;

They can still benefit through you, your Logo should be something like this:
We manage your funds on your behalf, aiming for 5% to 20% monthly returns on your investment depending on the amount of the money invested and the tenor.

Odds Format

This is a very funny thing. What I mean is that we're all from different part of the world and we all use different kind of odds. In UK, they use the fractions, in the US they use the American format and many people across the world use the decimal.

Anyway, we all know that it is the same thing. However, I know that many punters like to use the fractional format. The problem is that it is more difficult to make all the calculations when you need to place your bets.

This is not a problem now on the net because almost every sportsbooks will offer the possibility to display the odds in any format you want. So, just set the odds to be displayed in decimal.

Screenshot below

Fractional odds also known as British odds or UK odds

This is the favored method of quoting odds by UK Bookmakers, fractional odds quote the net total that will be paid out to the bettor, should he win, relative to his stake.

Odds of 6/1 ("Six-to-one" or "Six-to-one against") implies that the bettor stands to make a \$60 profit on a \$10 stake. The bettor stake is also returned making a total return of \$70.

If the odds are 1/6 (read "six-to-one on"), the bettor will make \$10 on a \$60 stake. Odds of 1/1 are normally called evens.

Decimal odds also named European odds or continental odds

Decimal odds are favored in continental Europe and Canada. Decimal odds differ from fractional odds in that they quote the total amount that will be paid out to the bettor including their initial stake.

So to put it simply, decimal odds of an outcome are the same as the decimal value of the fractional odds, plus one.

The 6/1 fractional odds used above would be quoted as 7 ($1+(6/1)$), while the 1/6 odds would be quoted as 1.167 ($1+(1/6)$).

Decimal odds are considered to be ideal for parlay betting, because the odds to be paid out are simply the product of the odds for each outcome bet.

If you are not new to sports betting then you will understand what the word “odds” stand for, but for the sake of other newbie’s, let’s explain the meaning.

The word odds is what the bookmakers use in calculating profits in sports or football betting, just like brokers uses Pips to calculate profit in forex trading. Ok

Hope you got it?

We have 3 types of odds

- 1) American odds
- 2) Decimal odds
- 3) Fractional odds

Example of odds:

Decimal odds (1.91)
American odds (-110)
Fractional odds (7/4)

In football trading we are going to be using “decimal odds” so the odds that qualify for football trading must be above 2.00.

Screenshot to prove what I’m saying

Saudi Arabia League		Reset	Bet		
Book Closes		1	X	2	
04 Dec 16:45	Al Ittihad v Al Hilal	2.00 <input type="checkbox"/>	3.25 <input type="checkbox"/>	3.20 <input type="checkbox"/>	+12
04 Dec 16:45	Al Raed v Al Ettifaq	2.50 <input type="checkbox"/>	3.10 <input type="checkbox"/>	2.50 <input type="checkbox"/>	
04 Dec 16:45	Al Shabab v Abha	1.20 <input type="checkbox"/>	5.50 <input type="checkbox"/>	9.50 <input type="checkbox"/>	+12
04 Dec 16:45	Al Watani Tabuk v Al Wehda	2.50 <input type="checkbox"/>	3.10 <input type="checkbox"/>	2.50 <input type="checkbox"/>	

Let’s see an example below:

1	X	2
2.20	3.50	2.20

2.65	3.25	2.65
2.75	3.10	2.65
2.60	3.16	2.50
2.50	3.45	2.45
2.45	3.15	2.25

How to Place Your Trade Online

Step 1

The first thing you need to do is of course opening an account with at least one sportsbook. You already know that. So the very first step to use this system is to open your PC and log on to your sportsbook account.

So, what you have to find at this moment is a game with a very specific odds, no matter what the **league** is. One important thing you must understand is that we have to find the best odds that fit our needs and not the odds of our favorite team.

Here, we are looking for a specific odds for the home team, the draw and the away team. Or odds for 1 X 2. We want all the odds above 2.00 and the odds for the home team must be almost the same as the odds for the away team. No matter what the odds for the draw are.

This is of course very hard to find. So, what we will do is to find the odds with the smallest difference between these 2 odds.

You will have to look at many games but it is very easy to find and within 5 minutes, this work will be done.

Now let's look at a real screenshot:

Sunday 7 December, 2008

1x2 Full/Half Time

Time GMT +01:00	English Premiership (1st row Home Team)	Full Time	Half Time
4:00 PM	W.B.A Portsmouth	2.62 <input type="checkbox"/>	3.25 <input type="checkbox"/>
<input type="checkbox"/>	Draw	3.25 <input type="checkbox"/>	2.05 <input type="checkbox"/>
4:59 PM	Everton Aston Villa	2.62 <input type="checkbox"/>	3.25 <input type="checkbox"/>
<input type="checkbox"/>	Draw	2.65 <input type="checkbox"/>	3.25 <input type="checkbox"/>
		3.20 <input type="checkbox"/>	2.05 <input type="checkbox"/>

You see that following this screenshot, the best match that fit this rule for Sunday 7th of December 2008 is W.B.A vs. Portsmouth with odds of 2.62 3.25 2.62.

So, in this case, this is the odds we will use. The reason why we are selecting these odds is simply because in these cases, any team can win and they can also end with a draw.

This is exactly what we want. We want the final result to be different from day to day with the highest odds as possible and this is the best way to do it.

Now that we know what game we will be using,

Let's go to step 2.

With this system, we will use a powerful progression on each outcome at the same time. This is the second secret for this system. By doing this, we will always win and protect our bankroll in case we hit a losing run. However, I'll show you a simple but very powerful trick if you have a bad run.

You have to understand that by betting on the 3 possible outcomes, you are guaranteed to win at least one bet, so we will profit from this.

However, before we continue, you have to learn the simple progression.

Ok, now what we're going to do is run 3 sessions at the same time for the draw possible outcomes you may have. This is one session for the home team, one session for the away team and one session for the draw.

So I think the best thing to learn how it works is to use an example.

As you already know, we will use the game that fits the best odds following Step #1.

So, we will assume that we are betting on one game everyday. Sure you can use more games a day and I'll show you later how you can do it but for now, let's use one game a day.

So, let's go...

First, let's say that the odds are:

1	X	2
2.58	3.19	2.59

We have to calculate each bet we have to place for each possibility.

Let's write down the numbers on our paper assuming that we want to make \$10 profits for each session.

Outcome 1: 10
Outcome X: 10
Outcome 2: 10

So, following step #2, we have to calculate each bet for each odds.

Our 3 bets will be 6.33 (1), 4.57(X), and 6.29(2).

We have to stake a total of \$17.19

Example of how to place your 3 bets using 1 sportsbook below:

UEFA Cup		Reset	Bet		
Book Closes		1	X	2	
04 Dec 19:45	Aston Villa v MSK Zilina	1.33 <input type="checkbox"/>	4.75 <input type="checkbox"/>	10.00 <input type="checkbox"/>	+35
04 Dec 19:45	FC Copenhagen v Rosenborg	1.57 <input type="checkbox"/>	4.00 <input type="checkbox"/>	5.50 <input type="checkbox"/>	+31
04 Dec 19:45	Heerenveen v Braga	2.60 <input checked="" type="checkbox"/>	3.30 <input checked="" type="checkbox"/>	2.70 <input checked="" type="checkbox"/>	+31
04 Dec 19:45	Lech Poznan v D Coruna	3.10 <input type="checkbox"/>	3.40 <input type="checkbox"/>	2.25 <input type="checkbox"/>	+31
04 Dec 19:45	Nancy v CSKA Moscow	2.25 <input type="checkbox"/>	3.25 <input type="checkbox"/>	3.25 <input type="checkbox"/>	+30

Selections	Odds	E/W
<input checked="" type="checkbox"/> 1 Heerenveen	2.60	
Stake <input type="text"/>	To Win <input type="text"/>	
Bet Max		
<input checked="" type="checkbox"/> 2 Draw	3.30	
Stake <input type="text"/>	To Win <input type="text"/>	
Bet Max		
<input checked="" type="checkbox"/> 3 Braga	2.70	
Stake <input type="text"/>	To Win <input type="text"/>	
Bet Max		
▶ Multiple Bet Options		
- Total Stake: 0.00		
Remove All		Place Bet

Put in your odds for the 3 bets and click on place bet button. You are done. Hope you can see that placing your trade is very simple.

Now let's assume that the home team (1) win. Here's what we will have as a total profit:

1: +10
 X: -4.57
 2: -6.29

So, we are down only \$-0.86. Not bad hey! But you'll see that it will be more fun later.

Now, you have to write down the amounts lost next to the number on each session. So, here's what we will have:

1: 10 (Because we have won this session)

X: 10 + 4.57
 2: 10 + 6.29

Our next target for each session will be 10 (1), 14.57 (X) and 16.29 (2)
 The next day the odds are

1	X	2
2.44	3.17	2.74

The next bets in order to win our target will be 6.94 (1), 6.71 (X), and 9.36 (2)

Now, we win our bet on the away team (2). Let's see our total profit:

1: -6.94
X: -6.71
2: +16.29

Our total profit for this day is \$2.64. If we subtract \$0.86, we have a net profit of +\$1.78.

Now you have 2 options.

First you can take the profit and start 3 new sessions, small profit of 1.78 is not a lot but you did risk a lot of money and the goal at sports betting and at football betting is to go slow and win day by day. It is really up to you.

The other option is to continue the system by running the same 3 sessions without ever ending. By doing this, you'll see that the profit will grow very fast. Now let's see what could happen.

We have to write down the amount lost next to the numbers we have written down on our paper.

1: 10 + 6.94
X: 10 + 4.57 + 6.71
2: 10 (Because we won this session)

Our next target will be 16.94 (1), 21.28 (X), and 10 (2)

Let's say the odds are

1	X	2
2.45	3.05	2.87

Our next bets will be 11.68 (1), 10.38 (X) and 5.35 (2)

We win our bet on 1. We will have the following results:

1: +16.94
X: -10.38
2: -5.35

Total profit for the day +1.21
Total profit to date: + \$2.99

Now we write down the amount lost for each session:

1: 10 (Because we won this session)
X: 10 + 4.57 + 6.71 + 10.38
2: 10 + 5.35

Our new target will be 10 (1), 31.66 (X) and 15.35 (2)

Let's say the odds are:

1	X	2
2.33	3.19	2.87

Our stakes will be 7.52 (1), 14.46 (X), and 8.21 (2)

Let's say we win the draw.

We will have:
1: -7.52
X: +31.66
2: -8.21

Total profit for the day: + \$15.93

Total profit to date: + \$18.92

So, as you can see, the profits start to grow day to day and it is just like this from day to day.

My Tips:

Now, you may ask yourself what happen if I hit a long losing streak on the same session.

Well, it is very simple. To protect you bankroll and for keeping your bets as low as possible, you just have to calculate the sum of all the bets you have to place and split the amount in 3.

Let's say that the bets you have to place are the following:

Session 1: 7.45
Session X: 100
Session 2: 10.72

By looking at these numbers we can see that the session for the draw is going very bad. So, the sum of all these bets is \$118.17

So, all you have to do is divide \$118.17 by 3. The result is \$39.39.

Now, you will place a stake of \$39.39 on each possible outcome. That means for 1, X and 2. This way you are able to keep your bets low even if one of your sessions keeps going very bad.

So, that's it for this system.

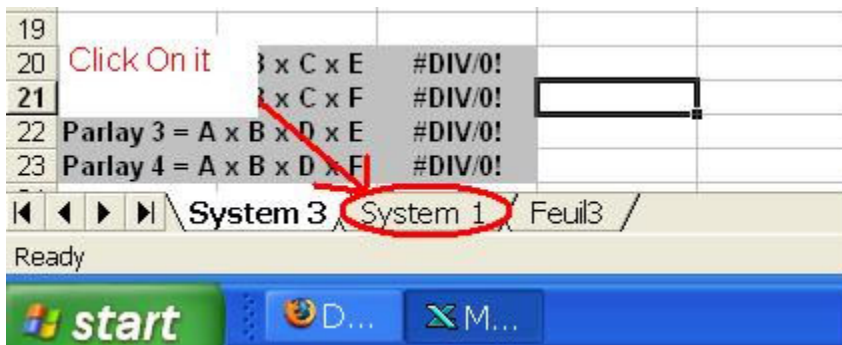

I know you are going to make a lot of money over the long run if you stick to the rules.

I know this might be a lot of numbers and that's why you can use the Excel spread sheet and just enter the numbers and you'll have everything you need instantly.

How to use the Automated Spreadsheets

Spreadsheet for football trading system

VERY IMPORTANT: Do not enter or erase any numbers that you don't have too. If you do so, you will erase the formulas and the spreadsheet will return many wrong numbers.

1. First, you have to enter a **Target** you would like to earn betting on the 3 possible outcomes.
2. After that, the spreadsheet will start to write some numbers but don't care about them. Most of them are wrong for the moment because you will have to enter some other information.
3. Next, entered the odds for each possible outcome that you have selected. Starting on day 1, **enter the odds for 1(Home), X (Draw) and 2(Away)**. As soon as you do it, you will start to see the bets appear. When it's done, you can see the 3 bets you have to place for each possible outcome under **Bet 1, Bet X, Bet 3**.

	A	B	C	D	E	F	G	H	I
1	Target		5						
2									
3	Day	Odds for 1	Odds for X	Odds for 2	Bet 1	Bet X	Bet 2	Result 1 (W/L)	Result X (W/L)
4									
5	1	2.6	3.25	2.4	3.125	2.22222222	3.57142857		
6	2				-8.125	-7.22222222	-8.57142857		
7	3				0	0	0		
8	4				0	0	0		
9	5				0	0	0		
10	6				0	0	0		

4. Again, don't care about all other numbers that will appear on other places. They are wrong and you don't have to use them. You always have to use the numbers that are on the same line than the line you are using right now. So, now you have your 3 bets to place. Place these 3 bets (1X2) in your favorite sportsbooks right away.

5. After the game, come back to the spreadsheet and enter the result for all of the 3 outcomes. Of course you can only have one winner and 2 losers. So, on the same line, under **Result 1**, **Result X** and **Result 2**, enter the result for each one of them. **Enter W for a win and L for a lose.** Immediately, the spreadsheet will return some numbers.

6. These numbers are the total lost for each session and the **Big Total**. This is shown under **TOTAL**.

7. The Total lost for 1, X or 2 are just here to make some calculations. You don't really need these numbers for your betting (trade). The spreadsheet simply uses these numbers to calculate the next bets.

8. What is really important is the **TOTAL**. This is where you see how much money you have made. You can continue on the same spreadsheet for many bets or you can simply start another spreadsheet. However, **you have to start to use a new spreadsheet when you are in profit.** This is very easy.

	A	B	C	D	E	F	G	H	I
1	Target		5						
2									
3	Day	Odds for 1	Odds for X	Odds for 2	Bet 1	Bet X	Bet 2	Result 1 (W/L)	Result X (W/L)
4									
5	1	2.6	3.25	2.4	3.125	2.22222222	3.57142857	L	L
6	2	2.5	3.45	2.6	5.41666667	2.9478458	3.125	W	L
7	3	2.6	3	2.6	3.125	5.08503401	5.078125	L	W
8	4	2.7	3.25	2.5	4.77941176	2.22222222	8.80208333	L	L
9	5				-12.9044118	-7.22222222	-5		

My Secret Of Turning \$500 Into \$64, 000 + Annually

When you start betting with your initial \$500, always target 50% monthly returns (profit). Use 1% of your bankroll for your trading on daily basis.

Here is how your sportsbook account can grow in the next one year by using my Football Trading Wealth Techniques.

Zero month \$500

1st Month \$750

2nd Months \$1,125

3rd Months \$1,687.5

4th Months \$2,531.25

5th Months \$3,796.875

6th Months \$5,695.3

7th Months \$8,542.96

8th Months \$12,814.4

9th Months \$19,221.6

10th Months \$28,832.4

11th Months \$43,248.6

12th Months \$64, 872.9

You can have up to 3-5 trades on some days and below are something's to note:

- 1) Time: every one of us know that football matches normally last for 90 minutes but some matches goes with extra time which make it 120 minutes of play, so to know if there's 3 trades on a particular day, you must look into the time each match is to be played.

Let's see examples of 3 trades in one day

Hope you can see that there is 4hrs gap between the time each game is to be played because the automated spreadsheet work for one match at a time, so you must wait for the results of each match before another.

Don't forget that it's the automated spreadsheet that will be showing you how much money to place on your 3 possible bets (Bet 1, Bet X, Bet 2)

Get Daily Football Trading Alert

Football trading alert is a service provided to football traders worldwide by fantasy football trading Experts.

No need to worry about not having time to hunt for the best odds that qualify for football trade.

We will do all the work required to make money for you, while you earn the profit. Very simple!

Trade-what-we-trade and get the same results on daily basis. No hustler!

Football Trade Alert are sent to your email box as soon as we confirm your payment

So I've decided to set the price of my daily Football Trading Alert at something you can afford.

You Are Covered By Harry Okoyibo's No Bull, No Questions Asked, No story, No Quibble, No Beef, NO RISK, Iron Clad, 100% Money Back Guarantee!

Subscribe for my daily Football Trading Alert today and if you are not 150% satisfied with winning rate...

If you don't make 10, 20 even 50 times your investment back (or more) in almost effortless earnings...If you don't think this is the biggest bargain in money making...

Just send me your bank account details and I will refund your subscription fee and offer my unreserved apology for wasting your time.

How's that for taking all the risk?

You no longer have any excuse for not making all the money you want.

Additional Bonuses

If you make your payment for my daily winning sports picks right away then all the bonuses listed below worth \$250 in total will be yours:

- 1) The Compiler football System
- 2) The Virtual football Games System
- 3) Chelsea, Arsenal & Man U Football System

- 5) How to Make free net call both Day & Night

FAQ

How do I get the Football Trading Daily Alert?

You will be getting all our **Football Trading Daily Alert** through your email box.

Why email box?

After careful consideration I decided on email box it's fast & easy for us instead of sms (Text message) that will not deliver due to network problem.

Subscription Plans:

One month N2, 500
6 months N12, 000
1 full year N18, 000

How do I subscribe?

To subscribe, first choose a subscription plan, then make your payment of the equivalent plan into our bank account.

Pay into my GTBank account

Ac No: 9014454581590

Name: Harrison Okoyibo

Email us at dailyalert@fantasyfootballtrading.com or text/call us on 08055624655 as soon as payment is made.

*****RULES*****

This is very important. There some rules you must always have in mind when trading on football matches. If you don't follow them, you might have a problem later.

Here they are....

Never Use All You've Got In Your Portfolio

No matter how tempting a bet is. Never use the entire amount you've got in a betting account on one single bet.

Things can go wrong any time. If you lose it, you will have to take money out of your pocket and not the other way round but in football trading you make money no matter the outcome!

Never Bet As A Fan

I know that many Nigerians are so familiar with Premiership but some do. Don't bet on any team because you love them or you always worn there Jessie example "**BLUES**" this is your money we are talking about so love, loyalty to that team or club should be secondary.

Never Be Greedy

Multiple bets (ACCUMMULATION OR PARLAY) are for losers. Do not get greedy; be happy to make a profit. People lose money when they want to hit it big once. Go play the lotto if you want to hit it big.

Be In Control

You now have what it takes to have your own money making venture online just like every other person. If you support a team, have any tips from mates etc ignore this because this system is to simply make you money, do not get emotionally involve in any of the games you are betting on you are only interested in the balance of your accounts.

Always Pull Out cash

We're in it to make money isn't it? So regularly pay yourself. If you are doing well, you can fix yourself a salary.

That's it. You now have what it takes to make more money trading on football games. Now go for it.

GOOD HEALTH AND PROSPERITY

In the book of 3 John Vs 2, the bible said:

Beloved, I pray that you may prosper in all things and be in health, just as your soul prospers.

It is always said that health is wealth; good health and prosperity are two good companions that can never be separated.

ACCUMULATION OR SPEND

Most people have the opposite habits with regard to money, instead of thinking in terms of accumulation, saving, and financial independence, majority of people thinks of spending and enjoying every penny they can get their hands on, plus whatever else they can borrow from friends.

As a certain point in life, each person comes to a crossroads. One road leads in the direction of earning, saving and accumulating, while the other road leads in direction of earning, spending, and getting into debt.

As a fully responsible adult, you must decide which road you are going to take. And no matter what road you have taken up until now, you are free to choose the road that you are going to follow from this day forward.

The first discovery about the thinking patterns of self-made millionaires is that they have the habit of thinking in terms of financial independence most of the time. From an early age or at a certain point in life, they become focused on achieving specific financial goals. They then discipline themselves to make whatever sacrifices are necessary to achieve those goals. They organize and reorganize their entire financial lives - their earning, investing, insuring, and spending activities in such a way that lead to financial freedom.

Let's make sure you understand the system

- 1) Have a profit target and stick to it, and your target should be 1% of your total bankroll (betting account).
- 2) Find the best odds that qualify for Football trading on a daily basis
- 3) Bet the amount required to return your target profit using the automated spreadsheet.

HOW TO MAKE MORE MONEY WITHOUT START UP CAPITAL AND RETIRE RICH

Many people out there have money but don't know how to invest it to make more money. There are still thousands of others that met with disappointment in forex trading, fix odds financial trading (**BetOnMarket**), stocks trading, e-currency trading because they loss all there investments.

Some of this people will be more than happy if you promise to make them profit on their investment and they will love to hand over there money to you for trade as long as you are sure of what to do with the money.

I make research on all the above mentioned investment opportunities and I found out that you must have up to date vital information, lot of sacrifices, be an expert, belong to a private only paid membership site or forum, getting good signal from other expert, and lot more before you are able to profit from all this type of investment because the market fluctuate (going up and down).

But the good news is that you don't need to become an expert before you can profit from football trading business because all that you need is what I've already compile and put together in this little report you are reading.

With football trading, you are in charge because the automated spreadsheet tells you the amount of money place on your daily trade and you are sure of making profit following all the step-by-step information contained in this book.

There is no way the market (The Bookmaker) will ever work against you and you will keep making money every single week, month and year, it's what I called "Non-stop money making machine".

When you see the potential of this business you can then start to source for money from friends and relatives or better still, you can start marketing your self for others to see what you are capable of doing with the money they keep in the banks for safety by organizing classes, seminars, presentation and lectures. "Money kept in the bank does not yield increase"

Let them know the area of your expertise and that they will earn good return on their investment with you.

We are watched football matches every week and read about the earning each players received every single week and we never bother to ask where does this money comes from or how does the club make so much money to pay each players like father Christmas. One of the ways they make money is through gambling (betting) and as long as the earth remains, football games, business, gambling will never die.

Using other people money (OPM) I one of the ways to grow rich and become very wealthy. Just take the bold step to start!

As for me, I have 3 types of plan for my clients to choose from depending on there target or goals.

3 Types Of Plan I Used

1 month plan (20% return)
6 months plan (150% return)
1 year plan (350% return)

Believe me you are going to make lot of profit for yourself if you use this same plan or you can modify it to suit your choice of clients. Ok

All you get to do is to thoroughly understand the concept of this business; you will then position yourself as a financial advisory, investment expert, and an automatic investment consultant.

A Note: target every one you know that can afford the minimum investment capital required ands always treat all your clients as **KING**. Be transparent, honest in your dealings; maintain business integrity with your clients. Ok

Always try your possible best to ensure your clients have the confidence to recommend your business to their friends and relatives because this is the secret to grow your business to the **NEXT LEVEL**.

HAPPY FOOTBALL TRADING SUCCESS.

CONCLUSION

All right. I hope you like this e-book and that you can see the potential of this system.

Now I want you to understand something. Sports betting including football trading are not just for fun. If you want to really make money then you have to use a system. Right

Also, you don't have to concentrate on your favorite team because we all have our different club and as for me I'm a lover of good team.

There are so many leagues and teams in the world to use for this system and with patience you will easily find what you're looking for. Of course some day you will have to search bit longer but believe me, it worth the time.

Remember you must go slowly and compound your profits depending on your target (goal) you set for yourself or what you intend to achieve at a particular space of time.

So my advice would be for you to read the system over and over again, and when you feel comfortable with the system, then you can then go ahead to make some real money with it.

In my opinion, Football trading Secret formula is the **BEST** for you to grow your profit to the **TOP**.

The most important...stick to the rules. This is the secret!

Have fun while you make online cool cash!
